

Neotechnology

BUSINESS SYSTEMS

Neotechnology Amicus for Multi-Site Businesses:

- Dramatically reduce company wide ICT costs by leveraging our experience, knowledge and systems
- Centralised pricing and product databases reduce companywide administrative overheads
- Seamlessly integrate multiple sites and multiple industries into a single, powerful system
- A single, integrated system provides decision makers with quality business intelligence

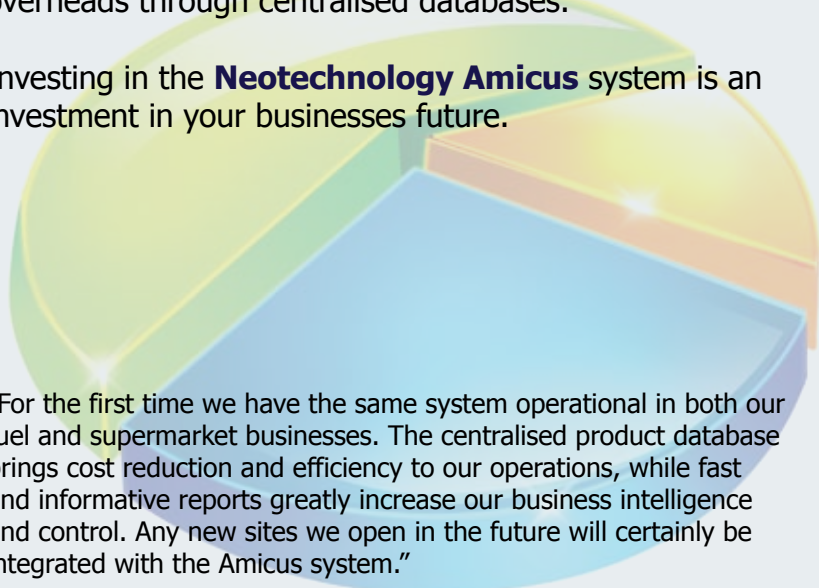

Neotechnology

BUSINESS SYSTEMS

Leverage our experience in store level and company wide operations integration with the **Neotechnology Amicus** system. It helps you to greatly reduce your company's internal ICT development and support costs and provides you with company wide integration, efficiency and control.

Individual verticals, such as fuel, retail and hospitality, can also be linked, providing company wide performance monitoring and reporting as well as lower administrative overheads through centralised databases.

Investing in the **Neotechnology Amicus** system is an investment in your businesses future.

"For the first time we have the same system operational in both our fuel and supermarket businesses. The centralised product database brings cost reduction and efficiency to our operations, while fast and informative reports greatly increase our business intelligence and control. Any new sites we open in the future will certainly be integrated with the Amicus system."
